procorem
for property management

What is Procorem?

Procorem acts as a portal for your property management company to organize documents, clarify communication, and securely store and share sensitive information. With Procorem, easily manage documents and business processes in a single location. The automatically generated audit trails track every file, and all property activity directly within a WorkCenter, which means you can see when others have accessed important documents, or offered comments to an existing file. Data can be accessed by approved individuals while they're on the go, from any mobile device.

"Procorem immediately made a difference in how I was able to manage my business. In one location, I can share sensitive financial data with partners and the board of directors, communicate about important decisions under consideration, and store data that I can later access and work on while on the go. With Procorem, I'm able to do more than ever with less effort."

- Mark Buster, CTO at BitWise Controls

Company Overview

Procorem was built by ProLink Solutions, a technology provider with more than 15 years of experience serving the nation's largest banks, government agencies, and private corporations.

procorem and property management

Take Control

Organize Your Data

Procorem allows users to store, share, and collaborate in a secure, digital space known as a WorkCenter. Everything's in one place so information is easily accessible and transferable to both internal and external parties.

Closing Department Automation

Save time, ensure accuracy, and improve the efficiency of the Closing Department with Procorem's automated application. Procorem can streamline this workflow process from the beginning to end.

Secure Storage

Procorem offers secure cloud storage for sensitive information. WorkCenters are invite-only, and each file is individually encrypted to ensure your data never ends up in the wrong hands.

Easy Board Communication

Eliminate numerous emails and easy to misplace papers. Our comprehensive collaboration tool allows users to comment on documents, assign tasks, manage Board Member voting and approval processes, and more!

Customized Reporting

Quickly sort and filter WorkCenter activity across a variety of useful criteria. Manage document status and workflow across any number of projects simultaneously.
